My Cat Is An Alien | "RE-SI-STEN-ZA!" | Opax Records | 2016

Los hermanos Roberto y Maurizio Opalio con amalgama de instrumentos, algunos de ellos inventados por ellos mismos, junto a variados dispositivos electrónicos, experimentan con texturas, resonancias, timbres y percusión que hacen de este dúo uno de los exponentes más importantes de la escena underground.

En este nuevo disco que contiene dos largos temas se encuentran la música experimental, ambient, noise y el rock psicodélico.

"RE-SI-STEN-ZA!"

es un poema de Roberto Opalio en el que plantea la reunificación de Alfa & Omega que representaría la más tenaz resistencia. Su voz fantasmal recita y vocaliza sin palabras, en tanto que ondas de radio, electrónica abstracta despliegan una muralla de sonido aplastante.

“Let Their

Voices Speak Through The Wind” es un coro de susurros que recorre un espiral con el bello tintineo de campanas en un ambient apacible.

En "RE-SI-STEN-ZA!"

MCIAA muestran su maestría para provocar con sonoridades extremas y ambientales, atmósferas inquietantes y al mismo tiempo ensoñadoras.

Italian Italian Brothers

Roberto and Maurizio Opalio create with an amalgam of instruments, some of them self-made, along with several electronic devices, experiment with textures, resonances, timbres and percussion that make this duo one of the most important exponents of the underground scene.

In this

new installment of the duo meet experimental music, ambient, noise and psychedelic rock.

"RE-SI-STEN-ZA!"

Is a poem by Roberto Opalio in which he proposes the reunification of Alfa & Omega that would represent the most tenacious resistance. His ghostly voice recitation, wordless vocalizations, while radio waves, abstract electronics unfold a wall of overwhelming sound.

"Let

Their Voices Speak Through The Wind" is a chorus of whispers that runs in a spiral with beautiful clink of bells in a peaceful ambient mood.

On

"RE-SI-STEN-ZA!" MCIAA show their mastery to provoke with extreme sonorities and ambience, disturbing and at the same time dreamy atmospheres.
